. Yes, the artwork is straight up adorable, the sound track is lovely and everything about this game is perfect EXCEPT the ♥♥♥♥♥ING controls. MY GOD this makes make so ♥♥♥♥♥ING FURIOUS EVERY GOD DAMN time i play this. This ♥♥♥♥♥♥♥♥ is IMPOSSIBLE to control. This fat ♥♥♥♥♥♥♥♥ moves on its own i swear to god. And i tell you what. I play a ♥♥♥♥♥♥♥♥ ton of games in my past that used this ♥♥♥♥♥♥♥♥♥♥ mechanism to make the player move, but this game... this ♥♥♥♥♥ing game takes the cake. You simply can NOT control the god damn cat on the bubbly air flow things (not the tunnels), cause if the screen is tilted by ONE ♥♥♥♥♥ing centimeter EVEN, the cat will (not) literally FLY OFF THE ♥♥♥♥♥ING SCREEN. Worst controls i swear to god. I am physically unable to enjoy this game since the wonder land levels. It makes me want to murder someone every time i lose ♥♥♥♥♥ing control because of that. NOT TO MENTION the auto-tilt feature, which randomly tries to rotate your screen back to base 0°. Just **why** ?

Other than that the game is super cute and the sound effects melt my heart. <3. Korea's pretty good! I like science based civs, but they're few and far between.. Very promising, but the developers need to finish the game before selling it ! No saving functionality, my progression in missions is regularly cleared and I have to restart everything. The (few) keyboard shortcuts are not working. Doesn't worth more than 3 euros. A "pause" button would be great, given that it's not easy to split a fleet while moving...

Hope the developers will update the game.. I am unsure of what urged me to buy this trilogy of "games". Perhaps it was the ♥♥♥♥♥♥♥♥ graphics. Or maybe it was the redundant gameplay that we've seen a million times before. Or maybe it was the nonexistent plot.

Trust me, this is a game you should avoid at all costs... even if that cost is only a dollar.

Game looks good. Killcams on enemy aircraft are awesome. I like the idea behind swapping out my parts, sort of car mechanic simulator but in a fighter. If the planes flew like a proper flight sim it'd be great. As it is however even the Realistic setting feels a little to arcadey for me as someone used to Il2, warthunder or dcs.

Devs seem to really care about their product. My original concerns of a full release being the usual early access final cashgrab before ditching a game appeared unfounded.

If you enjoy games like Ace Combat, Wings of Prey, this is right up your alley. If you're more of a simmer and were looking for a game with more storyline but those tight feeling controls this probably isnt for you.. played it a bit seems fun. not ready to release outside China region. Like the idea but had to refund.. Best experience on the Vive so far. The ending had me speechless and standing in shock. 10/10 Absolutely would recommend.. Wonderful experience. A great insight on what is to come in VR performance. Looking forward to what comes next from the team.. It was okay.
