About This Game

From Dust is the latest original game concept by Eric Chahi, creator of the cult classic, “Another World / Out of this World”. Immerse yourself in a world as exotically beautiful as it is dangerous! You control the destiny of a primitive tribe against the backdrop of a world in constant evolution—a universe where mighty Nature reclaims what is hers; and your mastery of the elements is your people’s only chance of survival...

Key Features:

- **Ground-Breaking Technology**

Play in the sandbox of one of the most advanced real-time nature simulations, where everything you see and interact with evolves dynamically, offering a constantly renewed experience.

- **Unique Art Direction**

Discover a large variety of environments: Tropical islands, volcanic landscapes, deserts and so much more...

- **Rich Story Mode**

Explore 13 breathtaking territories of emergent gameplay. Master the natural forces at play on a mysterious archipelago and help a primitive tribe to recover the lost powers of their ancestors.

- **Confront Mighty Nature**

Protect your tribe against Nature's most devastating attacks. Face down tsunamis, wildfires, earthquakes, volcanoes, torrential rains...

- **Master Godlike Powers**

Control the forces of nature to sculpt the world in your image. Hold back lava, stop raging waters, empty lakes, grow forests and raise mountains!

- **Live Up to the Challenge**

Race against the clock on 30 additional maps in Challenge Mode. Each scenario is a puzzle-like challenge where time is of the essence...

- **Online leaderboards**

Compare your Challenge Mode scores with the community on worldwide leaderboards.

Graphic is amazing, maybe is one of the most attractive fact I ever seen in my VR games list. Busy battle, you need to understand the time of countattack to stop enemy, or use teleporting to avoid be surrounded by enemies. Stand away from anemy and stand still will make quick recover. Boss is make you screaming and overwhelming if you don't battle tacticly. Other 2 weapons are fun as well, espacially the flying blade! Considering the price I will say it's definitely worth it!!! I played untill midnight and quickly fall in sleep:). The games are spot on ports from the WDW ride nice way to relive memoires. Not a complex game but simple fun!. Iru is horrible needs urgent buffs!!!. There're already lots of reviews about Pathfinder:Kingmaker so I'll keep it short.

In short, every good thing you've heard about this game is true. Fully realised Pathfinder ruleset, enormous adventure, decisions truly matter, great setting and the next best 'dungeons and dragons style game' after Baldur's Gate.

Everything bad you've heard about this game is also true. Unbalanced encounters, poor pacing, bugs, loading times, questionable design choices.

But I would say the good far outweigh the bad. Proof is I just can't stop playing this game! If you liked Baldur's Gate you owe it to yourself to give this adventure a spin!. A great experience! I love this feeling of a very nervous arcade game combined with the exigency of a tough die and retry. Stay Safe clearly challenges you and rewards you with well-designed levels and precise controls.

I also particularly appreciate the community of this game! People on Discord are very welcoming and helpful if you want to find some strategies to get the best times.

. This is a lovely game, with it's fair share of issues that can be easily overlooked. Cool combat with a few unclear mechanics that take some time to learn, (you should unlock playing as some of your party members as soon as you can since swapping between them makes the combat really enjoyable), Story's pretty sentimental in a good way but has some plot holes, nevertheless it will feel like there's someone cutting up some onions near you at some points of the game.

The world is just beautiful, everywhere you look you're bound to see some amazing scenery with some nice eastereggs here and there for fans of the franchise and with the Car they give you, even though the driving is pretty handheld so that you don't mess it up, just made travelling around seem like a really good road trip.

Main characters are all lovable and interesting with really good backstories dialogue and interactions. And ofcourse, The fishing is really well done, I spent more than 5 hours just fishing throughout my 1st play through since it can be both chill af or even challenging.

All in all, Yes, I do recommend this game.. Would be better if it had consistent speeds on the arrows it made it feel more like a reaction time game rather than a rhythmic game. A short free RPG game that's really cute and.....scary?. Fighting Classic, what's not to like? A must own for retro fighting fans!

This is THE most creative locomotion system ive ever played on VR, it solves the motion sickness issue really well, and its pretty intuitive, swinging ur arm to walk in virtual reality can never go wrong, its simulating real life movement making you walk, jog and run. To top it all, you can always change your controllers in the main menu with another awesome controller that actually work pretty well in this game, the trackpad locomotion system allowing you to move all around the game with no boundaries. Simply love the options in this game.

Running, ducking, gunning, avoiding incoming bullets and rockets, is so much fun and keeps your heart pounding. A great FPS with awesome looking graphics.

The shooting is pretty satisfying, its like holding a real gun in your hand with a great feedback from the controller.

Ive played the game for almost 7 hours and still didnt finish the last level, the arenas and the open sandbox areas keep you coming for more, with different hiding strategies and different starting points at each time until you finally make it.

In general the game is freaking awesome, worth every penny....

Hope you guys enjoy it, i know i did.. Little Lost Robots is the alternative to an IQ test game. There are 2 modes to complete the puzzles in order to get 3 stars. The least number of moves and the fastest times to get the robots home. Although the fastest times solution has already been pre-determined, the optimum amount of moves are player determined! So the best solution for this game...may still come from you! I can't believe such a simple game could have me hooked for hours just to get the best solution. I thought I was smart until this game came along. And my IQ is 152...apparently not high enough for this game.. I'd love to review this game, but I never got it to run. After forcing it to quiet after it stopped responding while the game was loading, I uninstalled it.. Turba is a puzzle game that try to mix youre music with some match making blocks. But will it succeed ? Turba has to be the worst puzzle game on steam without even trying. The game is a match four block type game. You choose a track and the game mode and thats it. The game doesnt even really explain what youre supposed to do so its up to you to understand what to do. The game is boring and not really worth youre money or time. Overall theres nothing more to say about this game. Turba is one of the worst puzzle games that you can buy on steam for 4 bucks just skip this and get something else. Also the game is barely stable to play. Just Skip this one. Turba gets a 2/10. I enjoyed my time with this game. I wasnt too familiar with the rules of Golf before playing this but the Golfing is pretty simplistic. I liked the way the charcter stats affect your golf game. it plays like an action RPG. there are some secrets to be found I found a few of them but I suspect not all of them. I bought this for 1.50 USD during the summer sale and having played it Id happily pay more for it.. Improves all of the aspects from the First game and is therefore pretty much (one of) the best platformers on Steam.

The first game suffered quite much from its Nintendo 3DS origins. Luckily this time the game doesn't feel like all characters were crammed into a very small screen which results much more smooth gameplay.

If I were to nitpick about something it would be the difficulty that is considerable easier than it was in the first part of the series. I don't miss all those pits or suddenly appearing enemies but cute bosses have somewhat lost their charm because of the easier difficulty. In the first game bosses either required multiple lives to find out barely survivable strategy or upgraded technical skill that was their weakness. This time I accidentally beat most of the bosses in (so-called) expert mode with normal shot on first or second try. In the first game utilizing weaknesses felt like strangely satisfying cheating after failing multiple times with normal shot but now just beating bosses makes me have guilty conscience.

Later Thoughts: Replay-value of the game is huge thanks versatility of gameplay. There are two (and half) characters to play that differ considerably but what really adds that replay-value is the shop system. There are the normal shops that sell stuff for current playthrough and "cheat-shop" that can be used to alter characters initial parameters. Beating the game even on the hardest difficulty isn't exactly very hard because you can farm currency and quite buy ease. The real difficulty of the game is to understand all those (stupid) things you can do with shop-system and how to tailor your playthrough. For example: like in most of the megamanesque games, all the sub-weapons/technical skills are used extremely little. However with cheat shop its possible to get enough initial currency to fully upgrade your (least) favourite technical skill which gives incentive to put it into main weapon slot. Sliding through the game and enemies (and into pits) is very different experience compared to just shooting things with standard shot.. This is an awful game. DO NOT BUY THIS JUNK!!

It makes all kinds of crazy "unchangeable" aspects of the game. It is obviously very politically motivated.

This game is a hot Steamy (pun intended) pile of socialistic, communist crap.
